***Reasons for Allowance***

1. Claims 3 and 5-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

While Carlson (Patent No. 5,623,592) discloses constructing an iconic sequence to drive one or more external devices performing a series of operations by generating control signals to the external devices. The icon sequence includes a device icon that represents the external device and an operation icon which represents an operation performable by the external device.

And Lehman (Patent No. 4,796,179) teaches an automatic computer software code generator uses a functional library to define a multiplicity of functional blocks for generating a functional description of a control system. The computational relationships to be implemented by the software are defined by specified combinations of functional blocks from the functional library.

Neither of these references taken either alone or in combination discloses a system for generating and storing a computer program for execution on a system having all the claimed features of applicant's instant invention, specifically including: a software module uniquely assigned and stored within an object to be controlled, wherein the software module provides an icon procedure for displaying an icon for the object in a display area on a monitor which automatically linked to a development of a program for the object based on the information stored on the object, wherein the development capable of identifying and acquiring the software module with a global unique ID. In addition, the system implements the developed program by sending and/or receiving messages to and/or from the object according to the program developed. Also, there is no motivation to combine the Carlson reference with the Lehman

reference to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
